In Mexico since 1971

March 2022

On the last Saturday afternoon in February pastor Manuel and Tina were visiting with one of the church members. They were approached by a man who was drunk and high on drugs. The man started hitting and kicking Pastor Manuel. He shoved Tina so hard she almost fell down. Then the man went after Manuel with a knife. Finally, Tina and Manuel were able to get away from him. Someone there helped Manuel and Tina get away. The man was the last contractor that we hired. He had been drinking and taking drugs on the job. He is also the one who sawed the locks off the doors. Manuel paid his contract and dismissed him. Now he wants us to give him all the tools that we have for working with cement. Manuel did not want to call the police, Because the catholic news media would have had a field day.

The first week in March I went from allergies to a sinus infection, to a throat infection, to bronchitis, to pneumonia, I have been down for 10 days. I have swallowed enough pills, and had enough injections to cure double pneumonia on a bull elephant. My first professor, my mentor, and my friend taught me over 52 years ago that when a ministry is growing, souls being saved, that Satan will always attack the head. That's myself and pastor Manuel.

Thank you for hanging in there with us. We are looking forward to warmer weather.

For Souls in Mexico
